### **DETAILED ACTION**

1. Applicant's submission of Request for Continued Examination (RCE) has been fully considered. All rejections have been withdrawn in view of applicant's amendments and comments.
2. Claims 1, 18 and 19 are amended, and claims 1-19 are pending.

#### ***New Rejections***

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 9, 10, 17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Breckwoldt (US 5,166,333).

Breckwoldt discloses a transparent methyl hydroxypropyl cellulose ether film (abstract and col. 4, lines 5-13 and lines 33-35). Applicant recites in the rejected claims 1, 2, 17 and 18 that the claimed film is used for directly printing on the film and that an ink jet printer is used for printing on the film. However, an apparatus used for printing on the film and an intention of printing on the film are not given patentable weight because applicant is neither claiming an apparatus for printing on the film nor claiming a film having a printed matter directly printed on the film.

5. Claims 1, 2, 9, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Koch et al. (US 3,899,452).

Koch discloses a self-supporting cellulose ether film, wherein the cellulose ether is preferably hydroxyethyl cellulose ether or hydroxypropyl cellulose ether (abstract and col. 1, line 38). Applicant recites in the rejected claims 1 and 2 that the claimed film is used for directly printing on the film and that an ink jet printer is used for printing on the film. However, an apparatus used for printing on the film and an intention of printing on the film are not given patentable weight because applicant is neither claiming an apparatus for printing on the film nor claiming a film having a printed matter directly printed on the film.

6. Claims 1, 2, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Koch (US 3,840,395).

Koch discloses a fibrous, non-fibrous or a combination of fibrous and non-fibrous cellulosic sheet made of hydroxyethyl cellulose ether (abstract and col. 1, lines 39 and 54). Applicant recites in the rejected claims 1 and 2 that the claimed film is used for directly printing on the film and that an ink jet printer is used for printing on the film. However, an apparatus used for printing on the film and an intention of printing on the film are not given patentable weight because applicant is neither claiming an apparatus for printing on the film nor claiming a film having a printed matter directly printed on the film.

***Allowable Subject Matter***

7. Claims 3-8, 11-16 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The closest arts Breckwoldt (US 5,166,333), Koch et al. (US 3,899,452) and Koch (US 3,840,395) neither teach nor suggest a cellulose ether film, wherein the cellulose ether is characterized in that, in 2 ml of an aqueous solution obtained by mixing 0.1 part by weight of the cellulose ether with 99.9 parts by weight of water at 20°C, the number of undissolved fibers having a length of 8 to 200 um is not greater than 1,000, and wherein said cellulose ether is characterized in that, when 100 g of the cellulose ether is shaken on a sieve having an opening of 150 um, the amount of cellulose ether remaining on the sieve is not greater than 25% by weight.

***Conclusion***

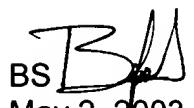

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Betelhem Shewareged whose telephone number is 703-305-0389. The examiner can normally be reached on Mon.-Thur. 7:30AM-6:00PM.
